## Additional Details

This stackable rattan chair is a beautiful asset for both indoor and outdoor use. The elegance of the high back design adds a stylish chic to the outdoor atmosphere. Designed especially for commercial use; the weather resistant weave and aluminum frame makes maintaining the chairs very easy, as it is constructed from a aluminum frame and synthetic rattan weaving, you don t have to worry about rust on the frame or mold on the weaving. If the frame or the plastic weaving gets wet, simply wipe it down with a dry cloth, it's that easy!
