15lbs

Additional Details

This bar-height rattan chair is a beautiful asset for both indoor and outdoor use. Designed especially for commercial use; the weather resistant weave and aluminum frame makes maintaining the chairs very easy, as it is constructed from an aluminum frame and synthetic rattan weaving, you don't have to worry about rust on the frame or mold on the weaving. If the frame or the plastic weaving gets wet, simply wipe it down with a dry cloth, it's that easy! Frame is durable yet lightweight aluminum wrapped in weather-defying resin wicker fiber to withstand fading, weathering, and aging. Perfect for outdoor use by the pool and in the garden.
