15lbs

Additional Details

This stackable rattan chair is a beautiful asset for both indoor and outdoor use. Designed especially for commercial use; the weather resistant weave and aluminum frame makes maintaining the chairs very easy, as it is constructed from a aluminum frame and synthetic rattan weaving, you don't have to worry about rust on the frame or mold on the weaving. If the frame or the plastic weaving gets wet, simply wipe it down with a dry cloth, it's that easy!
