Additional Details

Eiffel Arm Chair with Dowel Leg Base consists of a clean, simple form sculpted to fit the body. The wooden dowel legs give the molded plastic chair a softer feel, yet the metal rods connecting the legs hint at the geometric form that this chair's base is famous for. The Eiffel Side Chair is a good choice for a wide variety of settings, for living rooms, bedrooms, front porch, waiting areas and offices. It is made of organically shaped plastic seat and wooden dowel legs.
